HARDY ORNAMENTAL SHRUBBERY

Althea (Rose of Sharon) Grows 6 to 8 feet high. Blooms in August and September, these are the color spots of fall. Double Rose, Double White, Double Purple, Double Red, and Double Striped. 2 to 3 feet 60c each; \$5.00 per 10.

Berberis Thunbergi (Japan Barberry) An ideal shrub and hedge plant, beautiful in summer, with its arching, thorny branches thickly covered with small, fine leaves, which gradually change as autumn approaches, to a unique fiery crimson. The small blossoms eventually turn into berries which become red as the autumn frosts appear and cling to the bush well into the winter. 12 to 18 inch 2 branches 10c each; 12 to 18 inch, 3 branches, 15c each; 18 to 24 inch extra heavy, 30 cents. Write for price on larger amount.

Deutzia (Pride of Rochester) Grows 4 to 6 feet high. Flowers large, double white, tinged with blush. Blooms in May and June. 2 to 3 feet 60c each; \$5.00 per 10.

Spirea (Van Houtte) Grandest of Spireas. One of the best of shrubs; complete fountain of pure white; bloom in May and June. 10 to 15 inch 15c each; 18 to 24 inch 25 c each; \$2.00 per 10; 2 to 3 feet 35c each, \$3.00 per 10; 3 to 4 feet 50c each, \$4.00 per 10.

Spirea (Anthony Waterer) Dwarf, bushy, of spreading type. brilliantly colored rosy crimson. Very free flowering—at its best in late summer. 15 to 18 inch 50c each; 10 for \$4.00.

Hydrangea (Arborescens Grandiflora) The flowers are, in a large way, similar to the familiar Snowball in appearance; conspicuously white and imposing. 18 to 24 inch 50c each, 10 for \$4.00; 2 to 3 feet 75c each, 10 for \$6.50.

Hydrangea (Paniculata Grandiflora) The flowers are rich creamy white, changing to pink, then reddish bronze and green. It is entirely hardy, enduring the severest winters with no protection. 18 to 24 inch 40c, 10 for \$3.50; 2 to 3 feet 70c, 10 for \$6.00.

Snowberry (S. Racemosus) In conspicuous, rose-colored flowers in June and July; followed by large clustered, milk white fruits which remain far into the winter. The combination of pink flowers and white berries on the same twig is charming. 18 to 24 inch 50c, 10 for \$4.00.

Weigela (Eva Rathke) The flowers are produced in so great profusion as almost entirely to hide the foliage. Deep carmine red. 18 to 24 inch 75c, 10 for \$6.50.

Armour River North Privet This species of Privet is more hardy than others, making it especially desirable for planting in Northern latitudes, where it is subject to cold winter temperatures. They are almost evergreen, of dense compact habit; useful in shaded places. 10 to 15 inch 15c, 10 for \$1.00, \$8.00 per 100; 2 to 3 feet 25c. 10 for \$2.00, \$16.00 per 100.

HARDY VINES AND CLIMBERS

Boston Ivy (Ampelopsis Voitchi) Clings to brick or stone walls and is unsurpassed as a covering for chimneys, brick buildings, etc. The large pointed leaves are so thick as to give the appearance of shingling the walls with them. 2 years 50c each.

Wisteria One of the handsomest subjects for use on pergolas, porches and trellises; with attractive foilage and magnificent dense drooping clusters of pea shaped flowers, crowning the top.

SINENSIS—Blue Panicles about 12 inches long. 2 year, 65c each.
ALBA—White, 2 year, 70c each.

Clematis Grand for pillars and trellises, pegged down for bedding and for running over rockwork, old trees and stumps. They delight in rich soil and sun.

JACKMANI—Large flowered velvety, violet purple.

HENRYI—Creamy white.

MAD. ED. ANDRE—A distinct crimson red.

2 year 85c; one of each, three in all, for \$2.25

Remember Rathbun's Plants are guaranteed to please you in every way or we will gladly refund your money.

Quality Baby Chicks

For 1926

High grade, pure bred chicks, from purebred farm range flocks that are bred for heavy egg production. Hatched right and guaranteed to reach you in good condition.

OUR GUARANTEE

You take no risk in buying our chicks. We take all the risk. We prepay postage to your door and guarantee 100 per cent safe arrival. We always put in a few extra chicks to make up for small losses, if any, so you will be sure to have the number ordered. Before reporting the losses always count the number of live chicks instead of the dead ones. Then if you do not have the number of chicks you ordered, notify us at once and we will either replace them or refund cost of them.

We also guarantee our chicks to be purebred and true to name.

BOX 44-X

ANGOLA, INDIANA

RATHBUN'S NURSERY

GLADIOLI

We do not pretend to go into the latest novelties and introductions, but only those that have been on the market some time and from long and extended trial, have been found to be the very best. Gladiolus flowers last longer when cut than most any other flowers, and develop in water to a greater perfection than if left on the plant. Bulbs should be planted from the middle of April on into May. Set bulbs 2 to 4 inches deep and 2 inches apart in the rows. Beds do well planted 4 to 6 inches apart each way.

Peace Grand large flowers, reaching 5 feet; pure white with claret blotch on lower petals and pale lilac featherings. 8c each; 75 per 12; \$5.00 per 100.

Mrs. Frank Pendleton, Jr. Flowers very large, vivid pink, toning off blush, with large velvety orange red blotches in the throat. Strong growers. 8c each; 12 for 75c; \$5.00 per 100.

LeMarechal Foch Apple blossom pink, with rosy carmine center. Very early. 10c each; 12 for \$1.00; \$7.50 per 100.

Schwaben Delicate pale yellow, shaded with sulphur color. The golden yellow throat is lightly blotched with dull carmine. Flower spikes are tall and strong. 8c each; 12 for 75c; \$5.00 per 100.

Baron Hulot Rich, deep indigo blue. Besides being the only blue glad, it is really a very fine sort. 15c each; 12 for \$1.50; \$10.00 per 100.

Choice Mixed Desirable for large beds and massing. All large size bulbs and sure to flower. Made up of choice varieties. 10 bulbs for 30c; 25 for 60c; 50 for \$1.25; 100 for \$2.00.

Hardy Field Grown Roses

Roses do best in rich soil having plenty of humus or vegetable fibre in it. Stable manures are best for them. Dig trench to depth of two or three feet; then refill the trench mixing manure and soil together. Plant your Roses in the center, being very particular to press and stamp the soil firmly around the roots; and soaking the bed thoroughly at the finish. Roses must be partially protected for winter in Indiana and similar latitudes. Cover bed at least 6 inches with leaves or manure; a binding surface of dirt, cornstalks or boughs on top. To kill lice spray with kerosene emulsion or black leaf forty. The rose bushes we sell are not to be compared with the cheap trash offered by department stores and certain large mail order houses. They are two and three years old, large bushes, that will bloom the first year.

Hybrid Perpetual Field Grown Roses

Frau Karl Druschki

Immense pure white, they commence blooming with the June Roses. are conspicuous throughout the summer with their large flowers some times over 5 inches in diameter. 75c each; 5 for \$3.00.

Paul Neyron

A wonderful fall bloomer. It blooms unceasingly from June to November, on long thornless stems, furnishing a great quantity of uniformly shaped flowers, four to six inches across. Color a bright ruddy pink. 75c each; 5 for \$3.00.

Tea and Hybrid Tea

Two Year Field Grown Roses

American Beauty One of the best known and most prized of all American Roses. Deep pink approaching crimson, very fragrant. 80c each; 5 for \$3.50.

Sunburst A lovely bronzy yellow, with long spiral buds. Very select. 85c each; 5 for \$3.75.

Los Angeles One of the grandest all around Roses of American origin ever put on the market. The stems are long as American Beauty; the flowers are large as Paul Neyron; its freedom and continuance of bloom are remarkable; its color a flame pink, shaded gold at base of the petals. 90c each; 5 for \$4.00.

H. V. Machin Intense scarlet crimson; black stained and velvety; large, full and high centered. This is one of the richest colored of the red everbloomingers. 80c each; 5 for \$3.50.

Killarney Queen of the Irish Roses, of exquisite form and fragrance. With flowers white as snow. 75c each; 5 for \$3.50.

One of each kind or five Roses for \$3.75.

Rosa Rugosa

A valuable, perfectly hardy type much used in landscape work; the foliage is lustrous, dark green, usually corrugated, and is impervious to attacks of insect pests. Flowers are borne in clusters of varying size and construction, are succeeded by persistent fruits which carry their usefulness into winter.

Conrad Ferd. Meyer binning the ornamental qualities of its Rugosa foliage with the blossom beauty and perfume of the Perpetuals. Flowers large, cupshaped and double; of a delicate silvery pink, very fragrant.

Rosa Rugosa Rubra Single flowers, rosy crimson; orange scarlet fruits.

Rosa Rugosa Alba Single white. The above 75c each; 5 for \$3.00. One of each for \$2.00.

Hardy Climbing Roses

Climbing American Beauty Hardy, strong growing, rosy crimson flowers, produced freely in June; 2 year; 50c.

Thousand Beauties A single cluster of flowers is a whole bouquet in itself, hence the very fitting name Thousand Beauties. Color a tender rose, showing tints of carmine, white and yellow. Each 2 year 50c; 3 year 75c.

White Dorothy Perkins A magnificent, pure white clustered Rose. The vines are a sheet of white during their blooming period. 2 year 50c; 3 year 75c.

Dorothy Perkins A beautiful shell pink; flowers produced in clusters. 2 year 50c; 3 yr. 75c.

Crimson Rambler The famous crimson clustered climber. 2 year 50c; 3 year 75c.

Gardenia Yellow Rambler The best yellow rambler to date. Flowers large semi-double, in full clusters: a rich lemon yellow. 2 year 60c; 3 year 80c.

Paul's Scarlet Climber Winner of gold medal as best climbing Rose. Flowers vivid scarlet shaded with bright crimson, produced in large clusters. 2 year 65c; 3 year 80c.

TRUE TO NAME FRUIT TREES

There is a constant demand for high quality fruit of all kinds and in no class of fruit is the demand more noticeable than in apples. The varieties we offer are such as can be recommended and best adapted to the climate of Indiana and vicinity. Our trees are just as good as you can buy anywhere and are from a third to a half cheaper. The trees we sell for 50c are the same size and grade that others are asking from \$1.00 to \$1.50 for. Other Nurseries have to charge more for their trees, shrubs, and etc. because the most of them employ agents who receive from twenty-five to thirty per cent-commission on all orders good or

Y, ORLAND, IND.

bad, then the nursery adds on fifteen per cent to make up for these bad orders. Why not buy from us and save paying for refused stock and high commissions. If you have already ordered buy a few from us and see which is the best bargain. You be the judge.

For the best results buy the best trees in the first place. They are the cheapest.

APPLES

Summer Apples

Yellow Transparent, Liveland Raspberry, Sweet Bough.

Winter Apples

Baldwin, Banana. Delicious, McIntosh, Jonathan, Grimes Golden, Staymans

Winesap, Northern Spy, Rhode Island Greening, Spitzenburg.

First size trees, 5 to 7 feet 75c; 10 for \$6.50; 100 for \$50.00
4 to 5 feet 50c; 10 for \$4.00; 100 for \$35.00.

CHERRIES

Sour Varieties

Early Richmond, Large Montmorency, 4 to 5 feet 85c; 5 for \$4.00; 10 for \$7.00;

3 to 4 feet 75; 5 for \$3.50; 10 for \$6.00. Write for price on larger amount.

Sweet Varieties

Bing, very large black. Napoleon, large, pale yellow or red; very productive.

Windsor Fruit, large, liver colored, good quality. Tree hardy and prolific. Gov. Wood, large, light red, delicious. Tree healthy and productive. 4 to 5 feet 90c; 5 for \$3.75; 10 for \$6.50.

PEARS

CLAPPS FAVORITE—Very large, yellow and dull red, melting rich. August.

BARTLETT—Large, juicy, high flavored, great bearer. September.

FLEMISH BEAUTY—One of the hardiest and most popular. September.

SECKEL—Flesh very fine grained, sweet, exceedingly juicy; one of the richest and highest flavored pears known. 4 to 5 feet 75c; 5 for \$3.50; 10 for \$6.00.

PEACHES

CHAMPION—Creamy white. August.

LATE CRAWFORD—One of the best late varieties. Extra large yellow. October.

ELBERTA—The leading market variety. Follows early Crawford.

FITZGERALD—Fruit large, bright yellow, best quality. September.

J. H. Hale—It averages one third to one half larger than Elberta, ripens about five days earlier and is much superior in flavor. Color, a beautiful golden yellow, with extra small pit.

MAYFLOWER—Good early yellow peach. Bright red cheeked. Carries to market in fine shape and sells well, as it is the only early peach that is well colored. July.

KALAMAZOO—Large yellow, fine quality. Very productive. Early September.

4 to 5 feet 45c; 5 for \$2.00; 10 for \$3.75; 100 for \$35.00.

3 to 4 feet 40c; 5 for \$1.75; 10 for \$3.00; 100 for \$25.00

PLUM

BURBANK—Medium, red, sweet, most profitable among growers for market. Tree hardy vigorous grower, unequaled in productiveness. August.

LOMBARD—Violet red, juicy, good, hardy and exceedingly productive; one of the leading market varieties. August.

GERMAN PRUNE—Large, dark purple, sweet, good. One of the most popular for canning, because of its sweetness. September.

4 to 5 feet 75c; 5 for \$3.50; 10 for \$6.50.

APRICOT

ROYAL—Large, yellow, rich and delicious. Tree hardy, a good grower.

MOORPARK—Yellow. with red cheek, extra good freestone, very productive.

4 to 5 feet 50c; 5 for \$2.00; 10 for \$3.75.

QUINCES

ORANGE—Large, bright yellow, excellent flavor. 4 to 5 feet 85c; 5 for \$4.00.

MULBERRIES

NEW AMERICAN—Vigorous grower, very productive; the best variety for fruit; ripe from middle June to September. 3 to 4 feet 85c; 5 for \$4.00; 10 for \$3.75.

EVERGREEN TREES

Spruce

COLORADO BLUE SPRUCE—This is one of the showiest and most impressive evergreens. A vigorous grower and hardy, making fine specimens in a broad-based, sharply defined pyramid form. 4 to 6 inch 75c; 5 for \$3.00; 10 for \$5.00. 18 to 24 inch \$6.00 each. NORWAY—A rapid grower, pyramidal habit; exceedingly picturesque. One of the most popular evergreens. 10 to 15 inch \$1.00; 5 for \$1.00; 10 for \$7.00. 2 to 3 feet \$2.00; 5 for \$8.00; 10 for \$14.00.

Pine

MICHO (Dwarf Pine)—Leaves short and stiff, thickly distributed in tufts over the branches in a crowded way, somewhat similar to Austrian, with an equal depth and richness of color. 12 to 15 inch \$2.50.

Juniper

STRICTA—Chinese variety with a peculiar, conspicuous blue-green shade of color. Dwarf, very dense, cone-shaped; slow growing and useful in foundation plantings. 10 to 15 inch \$2.00; 5 for \$9.00.

ORNAMENTAL TREES

AMERICAN WHITE ASH—Rapid grower, smooth gray bark, glossy leaves. 6 to 8 feet 75c; 5 for \$3.50; 10 for \$6.00. AMERICAN ELM—A native tree of great size, wide spreading head and graceful drooping branches. 6 to 8 feet \$1.00; 5 for \$4.00; 10 for \$7.00.

SILVER MAPLE—A hardy, rapid-growing, beautiful native tree of large size. Valuable for producing a quick shade. 8 to 10 feet \$1.00; 5 for \$4.50; 10 for \$8.00.

SUGAR OR HARD MAPLE—A tree of grand proportions, often 120 feet in height. 6 to 8 feet \$1.00; 5 for \$4.50; 10 for \$8.00.

CAROLINA POPLAR—A rapid-growing tree, with large glossy leaves; valuable for quick shade. 8 to 10 feet 75c; 5 for \$3.50; 10 for \$6.00.

Everbearing Strawberries

We have one of the best fruiting strains in the country.

Champion (Per)

The record-breaking Everbearing Strawberry produced 6,000 quarts on one acre the season the plants were set. Three months after planting you commence picking berries and continue all summer and fall. The berries are larger than Progressive but resemble it very much. Color, the same beautiful dark glossy red; vigorous and good plant-maker. Place your order early as we will be sold out on this variety before the season is over.

Progressive (Per)

With us this has proven to be the most productive as a fall cropper of all the everbearers, excepting Champion. Fruit of Progressive is of good size, smooth, of good color and appearance.

We have been growing everbearing strawberries for the past 15 years, and we have found that most of the so called everbearers could rightly be called never bearing. Don't experiment—set either Champion or Progressive—they have stood the test and have proved beyond all doubt that they are the only real everbearing.

Spring Bearing Strawberries

Early Variety

Premier (Per)

Premier is without question the best early Strawberry of all time. In fact it is the perfect Strawberry for every purpose. The plant is deep rooted, vigorous and healthy. Commences to ripen ten days earlier than Dunlap and Gibson.

Berries extra large, rich red color, excellent quality and flavor. We consider this the best early berry. Be sure and give it a trial.

Medium Early

Senator Dunlap (Per)

This is the leading Strawberry throughout the United States. The demand for this variety has steadily increased every year since its introduction. We believe there are more plants set of this variety than all others put together. Plants are of medium size, perfectly healthy and very prolific. Fruit large, smooth, regular and very attractive in form. This is called the canning berry but is equally as good for the table or shipping. If you only set one variety, Dunlap should be your choice.

Gibson (Per)

One of the best and most profitable sorts of both home and market. Strong growers with long roots, abundant foliage, very productive. Berries extra large choice flavored, dark glossy red.

Eaton (Per)

A chance seedling. Berries conical in shape; size medium large, color, deep red. The flavor is all that could be desired. This, with its firm berries and wonderful attractive appearance, gives it the quality necessary to make it a good market berry and canner.

Cooper (Per)

This is the Strawberry you have read so much about. We are giving you the opportunity to buy the genuine Cooper at the price of ordinary varieties. The plant is a strong grower. Berries extra large, if not the largest strawberry grown. Cooper is in big demand everywhere, and the berries usually sell for double the price of others. Order your Cooper today and get started with big money maker.

Late Variety

Aroma (Per)

Prolong your season and increase your profits. You will make big money if you plant early, midseason and late varieties. For your late variety you should plant Aroma by all means. However, only moderately prolific. Hence the berry is always large, the color fine, and looks better in the box than any other variety grown. However the plants are very short rooted and will not stand transplanting as well as some others. You can always sell Aroma for \$1.00 per crate more than any other variety.

Blossom Sex

Varieties marked (Per) are those having perfect flowers. (Imp) are imperfect or female; the blossoms of these varieties do not bear any pollen and should have some perfect variety set near them to fertilize the blossoms.

SPECIAL OFFER

IN HOME GARDEN COLLECTION, ORDER BY NUMBER

NO. 1—To introduce our plants we will send 25 Senator Dunlap, 25 Gibson, 25 Cooper, 25 Premier, 100 plants in all to any place in the United States. Postpaid for \$1.25.

No. 2—Will send 50 Senator Dunlap Progressive Evh., 50 Gibson, 50 Aroma, 200 plants in all, to any place in the United States. Postpaid for \$2.00.

No. 3—Raspberry and Blackberry collection; Will send 25 Cumberland, 25 Cuthbert, 25 Columbian, 25 Eldorado, 100 plants in all, to any place in the United States. Postpaid for \$3.50.

Collections No. 1 and No. 3 for \$4.25; collections No. 2 and No. 3 for \$5.00 postpaid. We are sure you cannot duplicate these prices any place if quality of plants is taken in consideration.

Full or Everbearing strawberries make a profitable crop to grow for the roadside market.

Raspberries—Purple, Red, Black

Raspberries are easy to grow and are considered by some to be the best of the small fruits; soil that will grow good corn or potatoes will grow good Raspberries.

Purple Raspberries

Columbian (Purple Cap)

This variety is remarkable for vigor and productiveness. It will yield at least a third more than the most productive Black Caps. It is also harder than any of the Black Raspberries. It propagates from the tips the same as Black Caps. Fruit is extra large and of excellent quality, having a distinct flavor of its own; the color is a dark red when ripe, bordering on purple. Commences to ripen late, and has a long season; the best of all for canning. Our plants are of extra quality this season. Be sure to include some of these in your order.

Royal Purple

Another good Purple Cap. It continues in fruit for at least two weeks after Columbian is done. The canes are entirely hardy and the fruit is firmer than the Columbian—so firm that they can be shipped long distances safely in quart baskets. The plants of Royal Purple are not nearly so rampant as the Columbian but resemble Black Caps in appearance and size. The canes are almost entirely thornless. Pickers can go among the bushes of the Royal Purple without tearing their clothes off. It has been known to stand a temperature of 35 degrees below zero without injury.

Haymaker (Purple Cap)

This comparatively new variety is coming to the front very rapidly. Among its many points of excellence are these: Berries very large of extra good quality, season very late which makes it a very good market sort; berries ripening after other varieties are through bearing. This is bound to be a winner.

Red Raspberries

Cuthbert

The leading late market variety all over the country; strong grower, very productive, fruit firm, size large, of best quality, season medium to late. Cuthbert has been a favorite for many years, always yielding immense crops even in the most northern states. It has no fault and for an all-around berry we advise you to plant it.

Victory

This is a new red raspberry of the Cuthbert type. We fruited it for the first time the past summer and so far we are well pleased with it. The berries are larger than Cuthbert, firmer and better flavored. More productive.

St. Regis (Everbearing)

Plants are good growers, very thrifty and make many new plants. This variety fruits in the summer and again in the fall on the new growth. Berries bright crimson, large size, rich, sugary, with full raspberry flavor.

Black Raspberries

Cumberland

This is known as the Business Black Cap. It has been loudly praised by all who have grown it. Berries very large, firm; bush unusually hardy. Is more widely planted than any other black raspberry because of its productiveness and quality.

Blackberries

Eldorado

We consider this the most profitable Blackberry under cultivation today. Eldorado is perfectly strong and an upright grower. The canes are healthy hardy and enormously productive. It succeeds over a wider range of territory than most any other Blackberry and the plants are in great demand. Berries jet black, fine flavor, making it excellent for home use or market.

Dewberries

Lucretia

This is the standard of all the Dewberries. The berries are extremely large, having a beautiful appearance, and are of the excellent quality for either home or market. Ripen from a week to ten days before the ordinary Blackberries. Ships and keeps well.

Currants

Perfection

A cross between Fay and White Grape, retaining the valuable characteristics of both. Beautiful bright red, larger than Fay, holding its size to end of bunch; easy to pick; a superior bearer, less acid and of better quality than any other large currant in cultivation.

White Grape

Very large; yellowish white; very mild acid; excellent quality and valuable for the table.

Gooseberries

Downing

Large, handsome, pale green and of splendid quality for both cooking and table use, bush a vigorous grower, and usually free from mildew.

Josselyn

Large-sized, smooth, prolific and hardy, of best quality. Been tested over a wide extent of territory by the side of all the leading varieties, and so far the freest from mildew, both in leaf and fruit of them all. A wonderful cropper, with bright clean healthy foliage. Color red.

There is nothing that pleases us any more than a letter from a satisfied customer. We receive hundreds of them.

GRAPE VINES

Even under unfavorable conditions the grape vine will bear fruit, but good culture, pruning and spraying should be applied if the best quality of fruit is desired. No part of the fruit garden yields a richer harvest than the vineyard. Plant the vines from 6 to 10 feet apart each way, spread out the roots and cover them with about six inches of mellow soil. Keep the ground about them clean of weeds and the vines well trimmed.

Varieties

Caco A hybrid of the Concord and Catawba. It inherits the valuable characteristics of both varieties to a great degree. The vines are strong and vigorous, as yet untouched by disease of any kind. The fruit is very large in handsome, complete bunches; in color a rich wine red over amber. Exceptionally early bearing, usually showing several good sized bunches the second year. Its flavor is luscious, sweet, delightful.

Delaware Beautiful light red berries of unsurpassed delicacy. Bunches small and compact, flesh is juicy and of finest quality for table use with an unmatched splendor and sweetness.

Agawam Berries large, blue colored, sweet, aromatic. The vines are strong and vigorous.

Niagara The standard white grape, occupying the same position among the white varieties as Concord among the black; bunch very compact, greenish white changing to pale yellow when fully ripe. Skin thin but tough. A rampant grower.

Concord Berries large, jet black, and of excellent flavor. No matter how small the number of grapes planted in the yard Concord is almost sure to be included, and in regular vineyards throughout the country, Concord has been depeaded upon for the main crop.

Worden Vine moderate grower, very hardy and productive. Grapes very large, thin skin, very fine, blue black in color. One of the earliest ripening about 10 days before Concord.

Asparagus Roots

In planting, make soil rich, dig trench, set 12 to 18 inches apart, roots spread out, crown two inches below surface, and stamp in returned soil firmly.

Martha Washington

This new asparagus was sent out by the Department of Agriculture at Washington. As a standard variety for the production of fancy Asparagus for the home or market it stands ahead of all others in size, vigor, tenderness, quality, and rust resistance. 10 roots, 25c; 25 for 40c; 50 for 65c; 75 for 85c; 100 for \$1.00; 500 for \$4.00; 1000 for \$7.00; 5000 for \$30.00.

PARCEL POST RATES

Before making out your order, inquire at your local post office as to what postal zone you are located in from Orland, Indiana; then by referring to the above table you can easily determine the amount to add to your order to cover parcel post charges.

It is impossible to always determine in advance of packing just the exact amount of postage required, but the above schedule is very accurate. However, upon receipt of plants customers will sometimes find that they may not have remitted quite enough for postage, or possibly a few cents too much. If your original remittance was in accordance with this schedule we will not ask you to send any balance due us for postage and for the same reason, please do not ask us for any small balance that may be due you.

Special prices on large orders. Write us your wants and we will give you our lowest NET quotations on anything in our line.

General Instructions to Customers

TIME TO ORDER—Order early; if more plants are wanted they can be added later; if not prepared to send money, send a portion which will insure the booking of your order. The balance may be forwarded any time before shipment of plants. Orders are filled in rotation as received.

SEND MONEY—By check, bank draft, express money order, post office order or registered letter.

SUBSTITUTION—We have a large stock of plants and it is not likely that we will need to substitute. We do not substitute early in the season. But sometimes when an order comes in late in the season and we are out of some variety we substitute some similar variety unless expressly ordered not to do so.

SEASON OF SHIPPING—We begin to ship about March 10th and ship to about May 20th.

OUR GUARANTEE—We are very careful in growing, labeling and packing plants. Mistakes seldom occur. We guarantee our plants to be true to name and free from insect diseases. If any customer is dissatisfied about anything we want to hear from him promptly. We do our best to please our customers.

PACKING—Our plants are fresh dug for each order, labeled, packed in damp moss and are guaranteed to reach you in the best possible condition; if plants are damaged when received, kindly notify us at once.

TRANSPORTATION—We recommend shipping by express as it is safest, and everything considered it is the cheapest for large orders. The smaller shipments of 50 pounds can be shipped in all zones by parcel post and shipments up to 70 pounds can be shipped in the first and second zones.

Every shipment of plants we send out bears a copy of our Indiana Certificate of Nursery Stock Inspection. Our stock will be delivered promptly everywhere, as it is entirely free from insects, fungous diseases, crown gall, blue stem, mosaic, etc.

We are in position to give valuable advice on varieties and methods of culture. Write us.

You will notice in looking over your Nursery catalogs that they all have the BEST plants. We can't understand how they all have the best. Can you? Now while we don't claim ours the best, we do claim they are as good as any you can buy anywhere, and much lower prices than most of them. Compare our prices with those of other Nurseries and be convinced.

Make your home a real home by planting some ornamental trees, shrubs, roses, vines and flowers.
